We are a new age builder who blends old world craftsmanship with state of the art concepts, design, and technology to provide well thought out products that not only satisfy our customers, but push the entire industry forward. We hope you find everything you need here, but, if you don't, just call us! We are happy to help.

Craftsmanship is the quality that comes from creating with passion, care, and attention to detail. It is a value that is honed, refined, and practiced over the course of a career. It is the quality that defines the difference between our homes and our competitors.

Design is a creative activity whose aim is to establish the multi-faceted qualities of objects, processes, and services to the continued enjoyment and usability of our customers. We aim to marry functionality and fine details with clear-cut, sophisticated style and bold new ideas.

Consistency of actions, values, methods, measures, principles, expectations, and outcomes. It is in this fashion we will guide you through the important and complex process of getting the most out of your homebuilding experience.

Homes of equal cost are not always of equal value. True worth comes from selecting the best craftsmen and materials at reasonable prices and have them assembled in such a way that you enjoy your home for years to come. This is the true meaning of worth.

Customers make their purchasing decisions based on how they feel. When they are developing relationships with a product or service supplier, a person who smiles, is inviting, and is easy to talk to ranks high in customers' preferred qualities list. Our hands-on approach to customer care is designed to make the building process a pleasant and rewarding experience. We have one opportunity to build your home right and that's exactly what we intend to do
